The following report outlines emergency department (ED) and urgent care (UC) drug overdose events by Lake County residents during the month of May. During the aforementioned timeframe, a total of 48 recorded drug overdose ED/UC events met the inclusion criteria listed below and occurred among Lake County residents, accounting for 0.9% of all May ED/UC visits, and increasing from the previous month’s 38 drug overdose ED/UC visits. No fatalities were reported among those reporting to ED/UCs during the month of May.

In May, Lake County drug overdoses occurred among individuals ranging from 19 to 70 years of age. Three events involved an illicit substance, and 45 involved an unspecified substance (Figure 1). Moreover, 32 ED/UC visits resulted in routine discharge, while three were discharged to treatment, three left against medical advice, and 10 lacked reported discharge information.

Inclusion Criteria:

The data presented in this report was retrieved from Ohio’s EpiCenter Health Monitoring System, as identified by the “Ohio Opioid-Related: Suspected Drug Overdose” classifier. Data prior to August 2019 was identified using the “Traumatic Injury: Drugs” classifier. This report contains information about Lake County residents, regardless of ED/UC location, and drug-related cases include all ED/UC admits specifying overdose or poisoning. Admits without supporting information, or otherwise indicative of a suicide attempt, intentional overdose, or accidental insulin overdose were excluded from this analysis, as were cases presenting for detox or withdrawal symptoms. In most cases, the drug responsible for the overdose is not indicated. As such, the included figures are not limited to opioid-related events.
Geographical Distribution

In what areas were overdoses most prevalent?

In May, the greatest frequency of ED/UC overdose events occurred amongst those residing in zip code 44077 (Figure 2). The proportion of ED/UC overdose events increased by 5.6% in 44060, 10.3% in 44094, and 10.9% in 44095, as compared to the month of April, while decreasing 1.6% in 44057, 9.8% in 44077, 5.3% in 44081, and 10.1% in 44092. For the seventh consecutive month, no ED/UC overdose events were observed among residents of 44045.

ED/UC overdose events varied by age across each of the reported zip codes (Figure 3). Overdose event frequency was highest among those 25 to 44 years of age (60%), followed by those 45 to 64 years of age (23%), 18 to 24 years of age (11%), and 65 years and over (6%). No overdoses were observed among persons younger than 18 years during the month of May.

At which Lake County facilities did overdose events present?

During the month of May, West Medical Center experienced the highest number of all ED/UC visits observed among Lake County residents (43.8%), followed by facilities outside of Lake County (29.1%), TriPoint Medical Center (22.9%), and the Lake Health Madison Campus (2.6%; Table 1).

The May 2020 Lake County ED/UC overdose event rate per 100,000 population was the third lowest observed in the past 10 years, is 2% lower than that of May 2019, and was 54% below the peak 2017 rate of 45.1 (Figure 4).

Figure 4. Rate of May OD Visits by Year

In order to provide for comparisons of daily ED/UC overdose event frequency, May ED/UC overdose events by day are illustrated for 2018, 2019, and 2020 (Figure 5). The daily maximum of four ED/UC overdose events in April of 2020 is equivalent to the daily maximum of four reported in 2019, and 56% lower than the daily maximum of nine reported in 2018. Moreover, mean daily ED/UC overdose event frequency for May of 2020 (1.5) is similar (slightly higher due to rounding) to the rate in May of 2019 (1.5), and lower than that of May 2018 (2.1).

A total of five days with no ED/UC overdose events were observed during May of 2020, as compared to six days in May of 2019, and six in May of 2018. May 2020 overdose events peaked on May 6, May 11, May 25, and May 31, as compared to a single 2019 peak which occurred on May 11, and the 2018 peak, which occurred on May 4.
When organized by day of week, the frequency of ED/UC overdose events was highest on Monday (22.9%) during the month of May (Figure 6). Wednesday experienced the second highest event frequency (20.8%), followed by Friday (18.8%), Sunday (16.7%), Thursday (10.4%), Saturday (8.3%), and Tuesday (2.1%).

May ED/UC overdose events were more prominent during the 8:00 pm hour (Figure 7). Secondary peaks occurred around 1:00 am, 6:00 pm, and between 10:00-11:00 pm. No ED/UC overdose events were reported during the hours of 2:00 am, 4:00 am, 7:00 am, 9:00 am, 2:00 pm, or 9:00 pm hours during the month of May.

When organized by month, ED/UC overdose events decreased 7% from May to June, increased 57% from June to August, decreased 32% from August to November, increased 29% from November to December, decreased 47% from December to February, and increased 55% from February to May (Figure 8). A total of 203 ED/UC visits for drug-related overdose events have been observed thus far in 2020, as compared to 245 during the same time frame in 2019.
Project DAWN Naloxone Clinics

Due to the ongoing situation with COVID-19 and response efforts, all in-person Project DAWN Clinics have been canceled until further notice.

Training and registration to receive a naloxone kit is available on our website for residents of Lake County, as well as other counties in Ohio without an active Project DAWN Program. For more information, please visit: https://www.lcghd.org/naloxone-distribution/.

Pharmaceutical Disposal Instructions

Before disposing of pharmaceuticals at one of the drop-off locations, be sure to remove or black-out identifiable information on the pharmacy label. Disposable items suitable for drop-off include:

- Unused or expired medications
- Prescriptions, non-prescription pills, syrups, and creams
- Pain and mood altering medications
- Pain relievers, over-the-counter cold and flu medication, vitamins, and pet medications

Pharmaceutical Drug Collection and Disposal Locations

- Monday-Friday: 7:00 am - 8:00 pm
- Saturday: 9:00 am - 5:00 pm
- Sunday: 1:00 pm - 5:00 pm

Note: NO Sunday hours at Lakeland
