

COVID-19 in Lake County, Ohio: January 6, 2021

This report summarizes available data for total COVID-19 cases in Lake County, Ohio, including both laboratory confirmed and probable cases, based on cumulative data entered in the Ohio Disease Reporting System as of 2:00 pm the day prior to issue. The level of detail provided has been determined appropriate, given the number of cases in Lake County, to ensure the protection of sensitive individual health information. Some data are preliminary, and therefore subject to change.

Total Cases: 13,473

Two-week Incidence Rate
per 100,000 population: **693**

Lab Confirmed Cases: 12,821

New COVID-19 Cases by Event Date*

Probable Cases: 652

Antibody Positive: **16**

Antigen Positive: **564**

Non- Antigen/Antibody: **72**

Data Preliminary

*Event Date refers to the first date in a medical record associated with a given illness. For the vast majority of cases, the reported Event Date refers to the date of symptom onset (date on which the case first experienced COVID-19 symptoms). For the cases for which this date is unknown, the date presented refers to the date a specimen was collected for COVID-19 testing. Due to lags in testing and reporting, new cases may appear for dates several weeks in the past. A seven (7) day rolling average is included to assist in visualizing the trend, and the most recent value is indicated on the far right side of the graph.

Ages of COVID-19 Cases in Lake County

In accordance with thresholds for the release of zip code-level data established by the Ohio Department of Health, actual case counts have been provided for zip codes exceeding 100 cases of COVID-19.

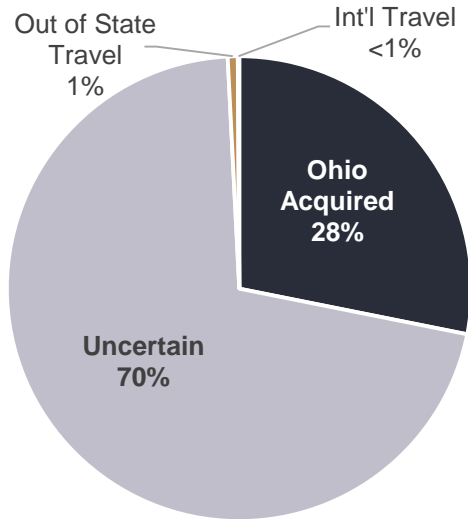

The following provides an overview of COVID-19 symptoms experienced by Lake County’s confirmed and probable COVID-19 cases. This information will be included in the report the first Wednesday of each month. To date, approximately 3% of cases have been verified as asymptomatic. Percentages reported for symptom frequency are based on the total number of reported cases.

*Other common symptoms reported included congestion, fatigue, weakness, dizziness, loss of appetite, loss of sense of taste and smell, chest pain/tightness, sneezing, and rash.

| Illinois | Rhode Island |
| Indiana | South Carolina |
| Kentucky | Tennessee |
| Maryland | Texas |
| Massachusetts | Wisconsin |
| Michigan | West Virginia |

The following graph depicts the number of new cases among Lake County residents by week, classified by the date reported to LCGHD and thus added to the cumulative count (positive test or diagnosis according to CDC case definitions). For the purposes of this report, weeks run from Sunday through Saturday. Data reported for each week reflect the number of cases reported from the previous Sunday, ending on the Saturday date shown. The date reported is used because new cases are regularly reported with symptom onset dates several weeks or more in the past due to lags in testing, reporting, and case investigation. Dates for the statewide orders, as well as major holiday observances, are added for reference.

New Cases of COVID-19 Reported by Week Among Lake County Residents

The following graph depicts the number of new cases among Lake County residents by week, classified by the event date, which is the first known date associated with a case. For most cases, this is the date of symptom onset (date on which the confirmed or probable case first experienced symptoms), but may reflect the date of test specimen collection in cases where onset date is unknown due to a case being asymptomatic, or delays in the verification of the onset date during case investigation. For the purpose of this report, weeks run from Sunday through Saturday. Data reported for each week reflects the number of cases from the previous Sunday ending on the Saturday date shown. Dates for statewide orders, as well as major holiday observances, are added for reference.

COVID-19 Deaths (Cumulative)

To date, 152 deaths have been reported among COVID-19 cases who were Lake County residents. For 29 deaths, cause of death was not directly attributed to COVID-19, or has yet to be determined. The subset reported below has been determined to meet the vital statistics criteria outlined in the [Ohio Infectious Disease Control Manual](#) as deaths from COVID-19. Those who do not currently meet the criteria, commonly referred to as “deaths with COVID-19,” are excluded from reported statistics.
