

COVID-19 in Lake County, Ohio: January 7, 2022

This report summarizes available data for total COVID-19 cases in Lake County, Ohio, including both laboratory confirmed and probable cases, based on cumulative data entered in the Ohio Disease Reporting System Data Extract as of 12:01 am Thursday prior to the date of issue. The level of detail provided has been determined appropriate to ensure the protection of sensitive individual health information. Some data are preliminary, and therefore subject to change.

Total Cases: 43,419

Lab Confirmed Cases: 35,854

Probable Cases: 7,565

Two Week Incidence Rate:
2,303.7
cases per 100,000 population

At Least 1 Dose Vaccine: 151,639 (65.89%)
Fully Vaccinated: 142,233 (61.80%)
(% based on total Lake County population per [ODH Dashboard](#))

CDC Transmission Rate (Weekly 7 Day Moving Average)

The graph above summarizes the seven-day rolling averages for Lake County's COVID-19 cases since the beginning of the pandemic and transmission rates beginning in January, 2021, according to county-level transmission rate data reported by the Centers for Disease Control and Prevention (CDC). Data is presented for each Saturday. This data informs the color-coded [CDC Community Transmission in the U.S. Map](#) which provides standardized data across the country and informs recommendations for preventive measures.

Ages of COVID-19 Cases in Lake County

Due to small population in some parts of Lake County, actual case counts have been provided only for zip codes exceeding 100 total cases of COVID-19 to date.

Zip Code	Total Cases	Change
44045	<100	NR
44057	3,624	+781
44060	10,619	+2,983
44077	10,619	+2,474
44081	1,171	+274
44086	<100	NR
44092	3,440	+1,013
44094	7,301	+2,048
44095	6,256	+1,857
Unknown	271	+35

The following graph depicts the number of new cases among Lake County residents by week, classified by the date reported to LCGHD and thus added to the cumulative count (positive test or diagnosis according to CDC case definitions). For the purposes of this report, weeks run from Sunday through Saturday. Data reported for each week reflect the number of cases reported from the previous Sunday, ending on the Saturday date shown. The date reported is used because new cases are regularly reported with symptom onset dates several weeks or more in the past due to lags in testing, reporting, and case investigation. Dates for the statewide orders, as well as major holiday observances, are added for reference.

COVID-19 Deaths (Cumulative)

To date, 572 deaths have been reported among COVID-19 cases who were Lake County residents. For 37 deaths, cause of death was not directly attributed to COVID-19, or has yet to be determined. The subset reported below has been determined to meet the vital statistics criteria outlined in the [Ohio Infectious Disease Control Manual](#) as deaths from COVID-19. Those who do not currently meet the criteria, commonly referred to as “deaths with COVID-19,” are excluded from reported statistics. Note, these statistics are compiled from the Ohio Disease Reporting System, and as of March 2, 2021, may no longer match death numbers reported on the ODH Dashboard, which now uses data exclusively from the Electronic Death Reporting System for COVID-19 deaths.
