

COVID-19 in Lake County, Ohio: July 8, 2022

This report summarizes available data for COVID-19 cases in Lake County, Ohio, including both laboratory confirmed and probable cases, based on cumulative data entered in the Ohio Disease Reporting System Data Extract as of 12:01 am Thursday prior to the date of issue. The level of detail provided has been determined appropriate to ensure the protection of sensitive individual health information. Some data are preliminary, and therefore subject to change.

Current CDC Community Level:
(as of 4/7/22)
Medium

Reported Cases 2020: 13,748
Reported Cases 2021: 29,294
Reported Cases 2022 YTD: 9,223

Two Week Incidence Rate:
199.0
cases per 100,000 population

Transmission Rate (Weekly 7 Day Rolling Average)

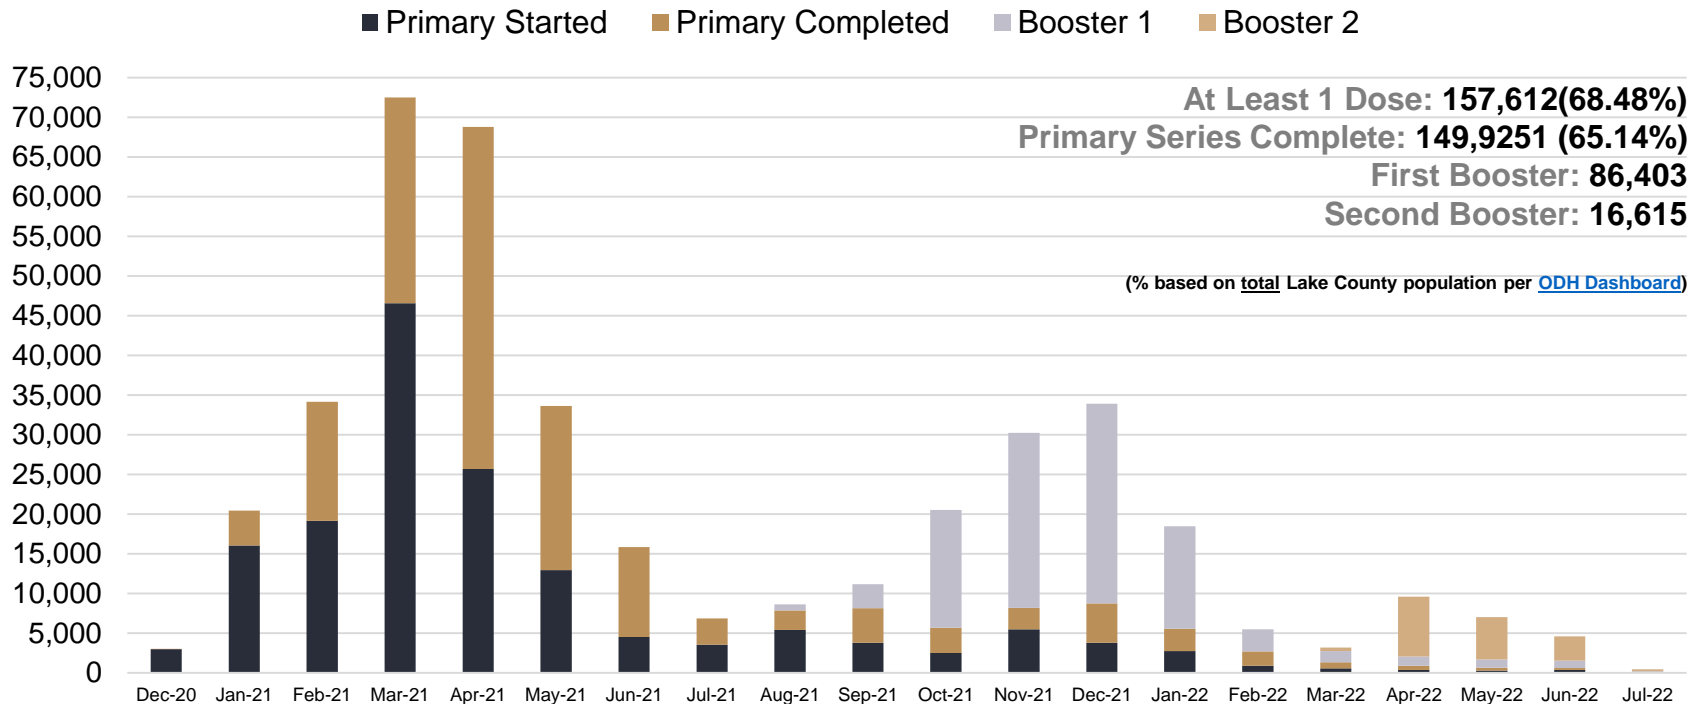

The graph above summarizes the seven-day rolling averages for Lake County’s COVID-19 cases since the beginning of the pandemic according to county-level transmission rate data reported by the Centers for Disease Control and Prevention (CDC). Data is presented for each Saturday, and provides an “Epi Curve” for context across the entire life of the COVID-19 pandemic.

The following graph depicts the number of COVID-19 Vaccine Doses administered to Lake County residents during each calendar month since COVID-19 vaccines became available in the U.S. Vaccination started refers to individuals who have received the first dose in a series (Pfizer or Moderna) or received one dose of J&J. Vaccination completed refers to individuals who have completed their primary vaccination/series (single dose of J&J or two doses of Pfizer or Moderna vaccines). Those in the completed group are also included in the started group count. Booster or Additional Dose(s) refers to vaccinations received beyond the primary series, including third primary dose for individuals with immunocompromised conditions or any booster doses for either healthy or immunocompromised individuals. Data is obtained from the [ODH Vaccination Dashboard](#) CSV file.

COVID-19 Vaccines Administered to Lake County Residents

COVID-19 Cases by Calendar Year

Demographic Trends for Lake County Resident COVID-19 Cases

Year	Age (Years)			Sex (%)		Race (%)					Ethnicity (%)

2020: 54%
2021: 28%
2022 YTD: 24%

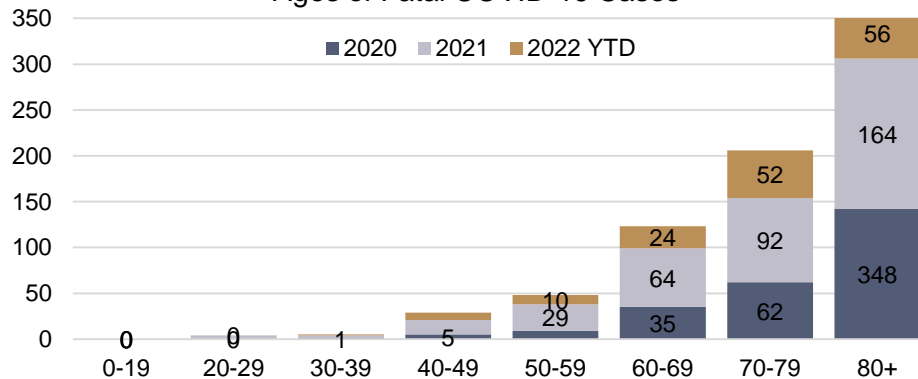

COVID-19 Deaths by Calendar Year

To date, 831 deaths have been reported among COVID-19 cases who were Lake County residents. For 54 deaths, cause of death was not directly attributed to COVID-19, or has yet to be determined. The subset reported below has been determined to meet the vital statistics criteria outlined in the [Ohio Infectious Disease Control Manual](#) as deaths from COVID-19. Those who do not currently meet the criteria, commonly referred to as “deaths with COVID-19,” are excluded from reported statistics. Note, these statistics are compiled from the Ohio Disease Reporting System, and as of March 2, 2021, may no longer match death numbers reported on the ODH Dashboard, which now uses data exclusively from the Electronic Death Reporting System for COVID-19 deaths.

Demographic Trends for Lake County Resident COVID-19 Deaths

Year	Age (Years)			Sex (%)		Race (%)					Ethnicity (%)		
	Min	Max	Median	Male	Female	White	Black	Asian	Other	Unk	Hispanic/Latinx	Non-Hispanic	Unk
2020	35	101	82	54	46	91	8	1	0	0	3	97	<1
2021	20	104	77	56	44	94	5	<1	1	0	1	99	<1
2022 YTD	38	98	77	49	51	95	3	N/A	1	1	1	98	1

Ages of Fatal COVID-19 Cases

Known Pre-existing Condition(s)
2020: 54%
2021: 18%
2022 YTD: <1%
