☐ Whole milk ☐ Whole low lactose/lactose free milk

D. Required Health Care Provider Information

Prescribing Health Care Provider's Name (please print): _____ Phone: _____

Prescribing Health Care Provider's Signature: _____ Date: _____

Instructions for use of this form:

All special formula requests are subject to WIC approval and provision based on program policy and procedure. Medical documentation is federally required to issue special formulas.

Section A

Section A must be completed in full for all patients. Medical diagnoses or conditions must be specific, and correlate with the indications for use of the requested formula. Special formulas cannot be provided by WIC solely for the purpose of enhancing nutrient intake or managing body weight. Pediatric beverages cannot be issued solely for the following: a child refuses to take a multivitamin; a child is a picky eater; a child is underweight, but is not diagnosed as having failure to thrive, and the diet can be managed using regular foods; a child is assessed to be at risk for or is overweight; or, a child is assessed to be at an average Body Mass Index.

Section B

Section B must be completed for all patients.

- The amount of formula provided per day must be measurable. Quantities such as “maximum,” “prn,” or “as needed” will not be accepted.
- The space for special instructions or comments can be used as needed. An open line of communication to the local WIC office is encouraged by including more information in this area, which may lead to more timely approval of the special formula requested.
- Please note that if a ready to feed (RTF) product is requested, it will require additional justification and will need to meet WIC standards. RTF products can be provided if the water supply has been determined to be unsafe; the ability of the caregiver to properly mix concentrate or powder formula is in question; for premature, low birth weight, or otherwise immunocompromised infants; or the participant has a medically relevant health condition which necessitates the use of RTF formula (i.e. continuous tube feeds). RTF formula cannot be issued for basic tolerance issues or participant preference.
- An intended length of use must be indicated. Six (6) months is the maximum length of time WIC can provide a special formula without a new Ohio WIC Prescribed Formula and Food Request Form.

Section C

If Section C is not completed, the WIC Health Professional will issue a food package as appropriate based on objective interview and patient preference. However, if whole milk or whole low lactose/lactose free milk are to be provided, the prescribing health care provider must indicate that in the bottom part of Section C.

Section D

Section D must be completed in full for all patients. Only a physician, physician’s assistant, certified nurse practitioner, clinical nurse specialist, or certified nurse midwife may sign off on this form. No other health care providers are authorized to sign. Prescribing health care providers must clearly print their name *in addition to* their signature or signature stamp. The date the form was signed must be provided.
